MGA004

It is a liquid product with a characteristic green color with good polishing ability in vibrators to fall, straight, toroidal (donuts).

The product is composed of a special mixture of surfactants and inorganic sequestrants which has the feature to give shine to the pieces without altering the color while keeping the balls clean.

In the use of balls, the fatty substances that detach from the pieces are kept in suspension allowing to obtain an excellent brilliance.

For a better result the pieces must be previously degreased.

Product suitable for gold objects.

HEALTH AND SAFETY

It is advisable to avoid skin and eye contact with the concentrated product.

Store in an environment where temperatures significantly below zero degrees do not remain

METHOD OF USE:

Doses:..... about 50ml for vibrator (13lt capacity)

Time:..... 30 minutes indicative
